

The highest quality, purpose built veterinary IV sets available on the market today

AniSet Anti-Kink[®]

Sets available in both 15 and 60 drops/mL and complete with many sophisticated features giving you peace of mind during the administration of fluid therapy.

Available in the following designs...

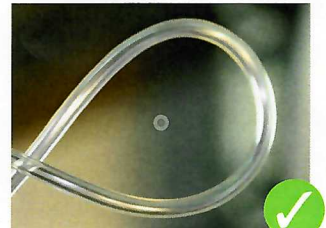

IV tubing that gives you less of this:

Break point with spin luer lock connection.

And more of this...

Flip covered bacterial air vent - Open when using non-collapsible bottles.

V bed roller clamp - Park your excess tubing here.

Particle filter.

Drip Chamber - with air-vented piercing spike and flip-covered bacterial air vent.

BAXTER PUMP compatible sets available!
Removable/reusable slide clamp enables use with Baxter fluid pump.

No pumps or too many patients? Use the DIAL-A-FLOW. Also suitable for use during CT/MRI Scans.

Fluid Priming Cap allows the set to be primed, expelling all air-bubbles without losing any fluid. Keeps the treatment area and patient clean and dry.

Choose sets with either the Anisite™ Injection Port with unique outer safety protector ring or the Needle-Free version with swabable valve.
